

one compound selected from the group consisting of benzoic acid, phenylacetic acid and the non-toxic, pharmaceutically-acceptable salts of said acids to a human suffering from such waste nitrogen accumulation disease, the amount of said compound used being sufficient to react with the waste nitrogen to form an amino acid acylation product for urinary discharge of said product.

Claim 2, line 1, change "1" to --11--

Claim 3, line 1, change "1" to --11--

Claim 4, line 1, change "1" to --11--

Claim 5, line 1, change "1" to --11--

Claim 6, line 1, change "1" to --11--

Claim 7, line 1, change "1" to --11--

Claim 8, line 1, change "1" to --11--

Claim 9, line 1, change "1" to --11--

REMARKS

The courtesy of the Examiner in granting Drs. Brusilow and Yates, and the applicants' attorney, Mr. Kokulis, an interview on March 31, 1980, is sincerely appreciated.

During the interview the generic claims were discussed as was the cited art generally. It was agreed that more circumscribed claim(s) which recited the mechanism of the operation would be submitted and at least claims 1 and 10 would be cancelled.
